

CARLO J. SACULSAN

09500435479 | carlosaculsan@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Diamond Villas Townhouse, Zabarte Ext., Novaliches, Quezon City

OBJECTIVE

Passionate and driven student seeking an OJT opportunity to apply my skills, contribute to a team, and grow through real-world experience.

QUALIFICATION

- Dedicated and hardworking individual with a strong drive to learn and deliver quality work.
- Able to adapt quickly to new environments, tools, and team dynamics.
- Comfortable collaborating with diverse teams and communicating ideas clearly.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend & Database: Supabase, PostgreSQL, REST APIs

AI Integration: Groq AI (LLM-powered features, review moderation, chatbot)

Tools & Deployment: Git, GitHub, Vercel, VS Code

PROJECTS

Hanap.ph — Home Services Booking Platform *Lead Developer (Thesis Project)* | home-service-web-five.vercel.app

Full-stack home services booking platform with multi-role access, PayMongo payments, and real-time tracking. Built with React, Supabase, and Tailwind CSS. Designed to connect Filipino homeowners with verified local service providers across categories such as cleaning, plumbing, electrical, carpentry, painting, and aircon maintenance.

NestPH — Rental Marketplace *(Solo Project)* nestph.vercel.app

Two-sided rental marketplace connecting renters and landlords with real-time messaging, listing management, AI-powered search, and an admin moderation dashboard.

Alterline — Worldbuilding & Creative Writing Platform *(Solo Project)* alterline.vercel.app

Personal knowledge base for fiction writers with a rich text editor, Wikipedia-style encyclopedia, relationship graph and AI writing assistant

EDUCATION

St. Claire College of Caloocan

Expected Graduation: 2027

Bachelor of Computer Science

Relevant coursework in full-stack development, software engineering, and UI/UX design.

ADDITIONAL INFORMATION

Strong problem-solving and collaborative development skills with experience in thesis-based software projects.

Interested in frontend engineering, UI/UX systems, and building user-focused web applications.

Experience working in collaborative team environments using Git-based workflows.
